Summary

Results oriented **Machine Learning Engineer** focused on building production grade AI applications. Proficient in optimizing **Deep Learning** models for real-time inference and integrating them into complex web architectures. Leverages a strong background in **Data Analysis** to drive model accuracy through rigorous **data preprocessing** and validation. dedicated to implementing MLOps best practices (CI/CD, Docker) to deliver robust, scalable, and secure intelligent systems.

Skills

- Java, C++, Python, SQL
- PyTorch, TensorFlow, LLM/RAG, NLP, YOLOv8
- Pandas, NumPy, MySQL, Google Cloud
- Algorithms & Data Structures
- RESTful & GraphQL APIs
- Docker, CI/CD, Git, AWS
- OOP , Design Patterns
- DevOps , Cloud Services
- DATABASE DESIGN
- DEBUG AND DOCUMENTATION
- TECH SUPPORT , TEAM LEAD
- GIT , GRADLE

Certifications

Certified Software Engineer
Certified Machine Learning Engineer

WORK EXPERIENCE

Software Engineer (Trainee) — 10/2025 – 10/2025

JPMORGAN CHASE & CO.

- Completed project setup, Kafka integration, and H2 database tasks.
- Developed and tested REST APIs using Spring Boot.
- Implemented event-driven architecture with Kafka consumers.
- Worked with JPA for database operations and transaction management.
- Gained practical experience in software engineering best practices and API development.

AWS Solutions Architecture (Trainee) — 11/2024 – 11/2024

AWS APAC Program

- Completed AWS cloud architecture training focused on scalable solutions.
- Gained hands-on experience with EC2, S3, Lambda, and VPC services.
- Designed demo AWS environments simulating real business needs.
- Enhanced skills in cloud-native application design and automation.

Machine Learning Engineer & Full Stack Developer

Freelance — 09/2024 – Present

- Engineered and fine-tuned custom **ML models** to automate business workflows for enterprise clients
- Designed scalable **REST APIs** to serve Machine Learning models to web and mobile clients, ensuring seamless frontend-backend integration

Machine Learning Engineer — 08/2025 – Present

Ecosync Nexus – (Lucknow)

- Architected the end-to-end ML pipeline for an IoT energy management system, integrating predictive models with Android and Web clients for real-time control
- Engineered and deployed predictive energy models using **XGBoost and PyTorch**, optimizing for low-latency inference on edge devices.

Machine Learning Engineer — 10/2024 – 11/2024

GSSOC Contributor

- Contributed to the official **SciPy** library by rectifying mathematical inconsistencies in the sparse.linalg.eigsh documentation (PR #18214), ensuring accurate operator definitions for eigenvalue computations.

EDUCATION

Bachelor of Technology: Computer Science Engineering (AI) — 07/2024 – 07/2028

Babu Banarasi Das University at Lucknow

Topper of class with CGPA 9.33
Dean's List, Multiple Hackathons Winner,

ACCOMPLISHMENTS

- Winner of theme "AI and Robotics for Disaster Management" by Washington University of Science and Technology (WUST)
- Selected in Top 30 across India for Sustainovation Hackathon 2025 by Intin
- Finalist in the Integration for AI/GenAI Global Hackathon by Informatica
- 1st Winner of Hackathon 2025 by BBD University
- Ideation Finalist by SCRS Florida International University
- Finalist of SmallestAI hackathon by Smallest.ai, California

PROJECTS

- **Guardian Model**: Engineered a real-time harassment detection pipeline using **YOLOv8** and **OpenCV** to identify violations and trigger instant automated email alerts via **smtplib**
  YOLOv8 | Python | OpenCV | Pygame | smtplib | Numpy | PyTorch | TensorFlow
- **Washington Guardian**: Built a disease outbreak detection system using **Time-Series Analysis**
  | Python | Git | Google Cloud Console | Pandas | Numpy |PyTorch | TensorFlow | Scikit-learn
- **Informatica Compliance Guardian**: Automated regulatory compliance auditing using **NLP**
  Informatica cloud services | Javascript | Web
- **CareerPulse: content-based recommendation engine** using **TensorFlow** to suggest career paths.
  Javascript | PyTorch | TensorFlow | Google Cloud Console | Firebase Studio | CI/CD
